Summary

Frontend Developer & AI Engineer with 1 year of experience building production-grade web applications using React, Next.js, TypeScript, and Tailwind CSS. Specialized in AI-powered workflows (Claude, Gemini, Groq, Cursor), no-code tools (Framer), and full-stack development with Supabase, Firebase and Vercel. Passionate about turning complex ideas into clean, fast, and scalable digital products.

Education

Najot Ta'lim

Associate's Degree • A

Computer Software Engineering

Uzbekistan, Tashkent • Nov 2023 - Oct 2024

Completed a specialized Frontend Development course. Gained hands-on experience with HTML, CSS, JavaScript, TypeScript, and React. Developed responsive web interfaces, implemented real-world projects using Git and GitHub, and improved design skills through UI/UX principles.

Experience

Freelance / Self-employed

Uzbekistan, Tashkent

Frontend Developer & AI Engineer

August 2025 - Present

Built 5+ production-grade web applications using React, Next.js, TypeScript, and Tailwind CSS

Developed AI-powered features using Claude, Groq, Cursor and Gemini APIs

Built full-stack apps with Supabase (auth, database, storage) and deployed on Vercel

Created interactive landing pages and websites using Framer with custom animations

Integrated email services (Resend), analytics (Mixpanel), and error tracking (Sentry)

Worked on multi-language platforms (EN/UZ/RU) with i18n support

Projects

Vizionize AI

August 2025

Product landing page for Vizionize AI — a smart glasses and optics cleaner brand. Built entirely in Framer with smooth scroll animations, interactive FAQ section, product detail tables, multi-page routing (Contact, Terms, Refund Policy), and Stripe payment integration. Fully responsive with a clean, modern UI.

One Night One Humanity

April 2026

Luxury event landing site for a real 501(c)(3) nonprofit foundation built in Framer. Features parallax video backgrounds, scroll-triggered animations, dynamic speaker showcase with 23+ real-world figures (Stanford professors, ESA astronauts, Olympic medalists, Hollywood actors), multi-page architecture (Bel Air, Paris archives, Contact), animated statistics counters, and a custom invitation request form. Featured in Daily Mail, People Magazine, Entertainment Tonight, Yahoo Finance, and Business Insider.

The Butterfly Challenge

March 2026

Viral mental health awareness platform for a real 501(c)(3) nonprofit — "60 Seconds. 3 Names. 24 Hours." Built with React, Vite, TypeScript, Supabase, and Vercel. Features a 40+ modular component architecture, interactive 4-step Butterfly Protocol walkthrough (SEE/STAY/ASK/CONNECT), crossfading image carousel, Resend email integration, Mixpanel analytics, Sentry error tracking, and full SPA routing.
